HELP US LAUNCH **THE SHAKA PUBLIC HEALTH REGISTRY**

- Find out about MAA's bold action to provide Glyphosate testing of people and water. These results will contribute to changing EPA policy and the future of farming.
- Zen has spoken around the world and before major corporations about "Our Right To Know", the dangers of glyphosate, GMOs and their impact on children and health.
- Hear Zen's call to educate and empower millions on GMOs, offering organic and sustainable solutions and choices to protect families and health.
- She now wants to take SHAKA's "Right to Health" platform to the Mainland. It's the new paradigm!

Hear all about her plans to spread Aloha!

Our Right to Know is Our Right to Health!
